European Institute for Sciences and their Applications (EISA)

Dear Georges,

the Arnold Sommerfeld Center for Theoretical Physics (ASC) would be pleased to be accepted as an Institutional Member of the EISA. The ASC considers the EISA to be a very important and exciting undertaking.

The aims of the EISA are very closely aligned with those of the ASC, not only in terms of the initial scientific research area (particle physics) but also in terms of the importance attached to the training of young researchers and to public outreach. For this reason, the ASC looks forward to working closely with the EISA in attaining its objectives and in making the EISA a success.

Sincerely,

Prof. Dr. Dieter Lüst
Spokesman ASC
